Vahid Bashiri

Game Developer · Unity & C# · Mobile Games

Luxembourg | gedbashiri@gmail.com | +352 661 470809 | linkedin.com/in/vbashiri

TECH STACK

C# | Unity | HLSL Shaders | Android Plugins | Unity DOTS | React Native | Git | Unit Testing

EXPERTISE

- **Architecture** — SOLID, design patterns, MVP, DI
- **Tooling** — custom editors, in-house SDKs
- **Live Ops** — events, content, mini games
- **Performance** optimization
- **F2P** monetization & economy design
- **Game analytics**, data-driven decisions

EDUCATION

MSc, Software Engineering
Sharif University of Technology
2018 – 2021
Thesis: *Predicting opponent's movement in Dota 2*

BSc, Computer Engineering
University of Science and Technology
2013 – 2018

TEACHING

Software Engineering I
Dr. M. Habibi · Fall 2019

Software Engineering I
Dr. V. Rahimian · Fall 2019

Data Structures & Algorithms
Dr. H. Rahmani · Fall 2016

Formal Languages & Automata
Dr. H. Rahmani · Spring 2016

PROFILE

Game developer with **6+ years** building mobile games in **Unity and C#**, spanning project architecture, infrastructure systems, tooling and gameplay features. Backed by **2 years of software engineering** and an **MSc in Software Engineering**, I care about clean, testable code that lets live games keep growing.

Software Engineering

EXPERIENCE

Game Developer
Jul 2023 – Present
Magrid Learning Solution

- Ship new content and features for a game live for **3+ years**, keeping full **backward compatibility**.
- Designed a **shared client/server library** unifying models and validation.
- Refactored the codebase to **MVP**; used the Strategy pattern and **dependency injection** for high unit-test coverage.
- Built **smoke tests** that sped up releases and a **custom level/content editor**.

Game Developer
May 2021 – Oct 2023
Funtory Studio

- Developed **Jump Up 3D** and **My Monster Pet** — **2M+ downloads** on Google Play.
- Built an asset-bundle SDK for **Google Play Instant**, making **Robo Race** the studio's most profitable game.
- Co-developed in-house production **infrastructure** with the CTO.
- Technical point of contact for **3rd-party studios** on complex mechanics and optimization.
- Tuned games with data engineers using **analytics** and player feedback.
- Ran team workshops on Git, Unity DOTS and clean vs. disposable code.

Game Developer
Oct 2020 – Dec 2020
Segal Games

- Designed and built a **hyper-casual game** from scratch, published on **Voodoo**.
- Led a multi-disciplinary **team of 3**, owning resources and deadlines against the business plan.

Software Engineer
Oct 2018 – Sep 2020
Intelligent Information Solutions Center

- Developed the **React Native** app for Motoshub, including **native Android libraries** for file sharing and image editing; owned iOS maintenance.

Independent Game Developer
Jan 2021 – Present
Personal projects

Bridge Run, Playground, Rebel and Waterfall. *Details on page 2.*

PROFESSIONAL PROJECTS

Magrid

2023 – Present

Magrid Learning Solution · Educational game

- Extended a game in operation for 3+ years with new content and features, fully backward compatible.
- Shared library unifying validation and models across client and server.
- MVP refactor + Strategy pattern + DI → comprehensive unit tests; smoke tests for faster releases.
- Custom editor for designing levels and content.

Unity · C# · MVP · DI

magrid.education ↗

Robo Race

Funtory

Google Play Instant · Studio's most profitable game

- Developed an in-house SDK for asset bundles so the game could be delivered as a Google Play Instant game.
- The instant delivery made Robo Race the company's most profitable title.

Unity · Asset Bundles · SDK

Google Play ↗

Jump Up 3D & My Monster Pet

Funtory

Mobile · Google Play · 2M+ downloads

- Developed both games, reaching **over 2 million downloads** on Google Play.
- Polished and improved with data engineers based on analytics data and user feedback.

Unity · C# · Analytics

Jump Up 3D ↗ Monster Pet ↗

Hyper-casual Game

2020

Segal Games · Published on Voodoo

- Designed and built from scratch using SOLID and OOP design patterns.
- Led a team of 3, managing resources and deadlines to deliver on the business plan.

Unity · C# · Team lead

segal.games ↗

Motoshub

2018 – 2020

IIS Center · Social media app

- Mobile client for a social platform built on Oxwall, in React Native.
- Native Android libraries for sharing files and editing images; owned iOS maintenance.

React Native · Android · iOS
